MCA Semester - II
CAUC514: Full Stack Web Development

Submission Date: 06/02/2026 **Assignment 1 (Javascript)**

Concepts:

- **HTML, JavaScript DOM**
- **JavaScript Arrow Function, Event Handling**
- **JavaScript Object & Array**

1. Create simple JavaScript application for login using following task:
    - **Task 1:** Allow user/Admin to authenticate using Login ID and password from the list of users
    - **Task 2:** Allow user to register for the site.
    - **Task 3:** After Login if user is Admin allow admin to view all users details and also, allow admin to delete, update and search user details. If user is user, then allow user to view his/her details.

    Note:
    - Consider the user as student or admin
    - Display appropriate message with authentication
    - Apply validation when it is required
